The Athletics High Performance Center was built to offer top-level camp opportunities for local and international athletes at an international standard.

Designed for elite athletes, the Center will provide high-level services focused on high performance.

All elements of multi-disciplinary athletics have been reinterpreted with an artistic and aesthetic approach.

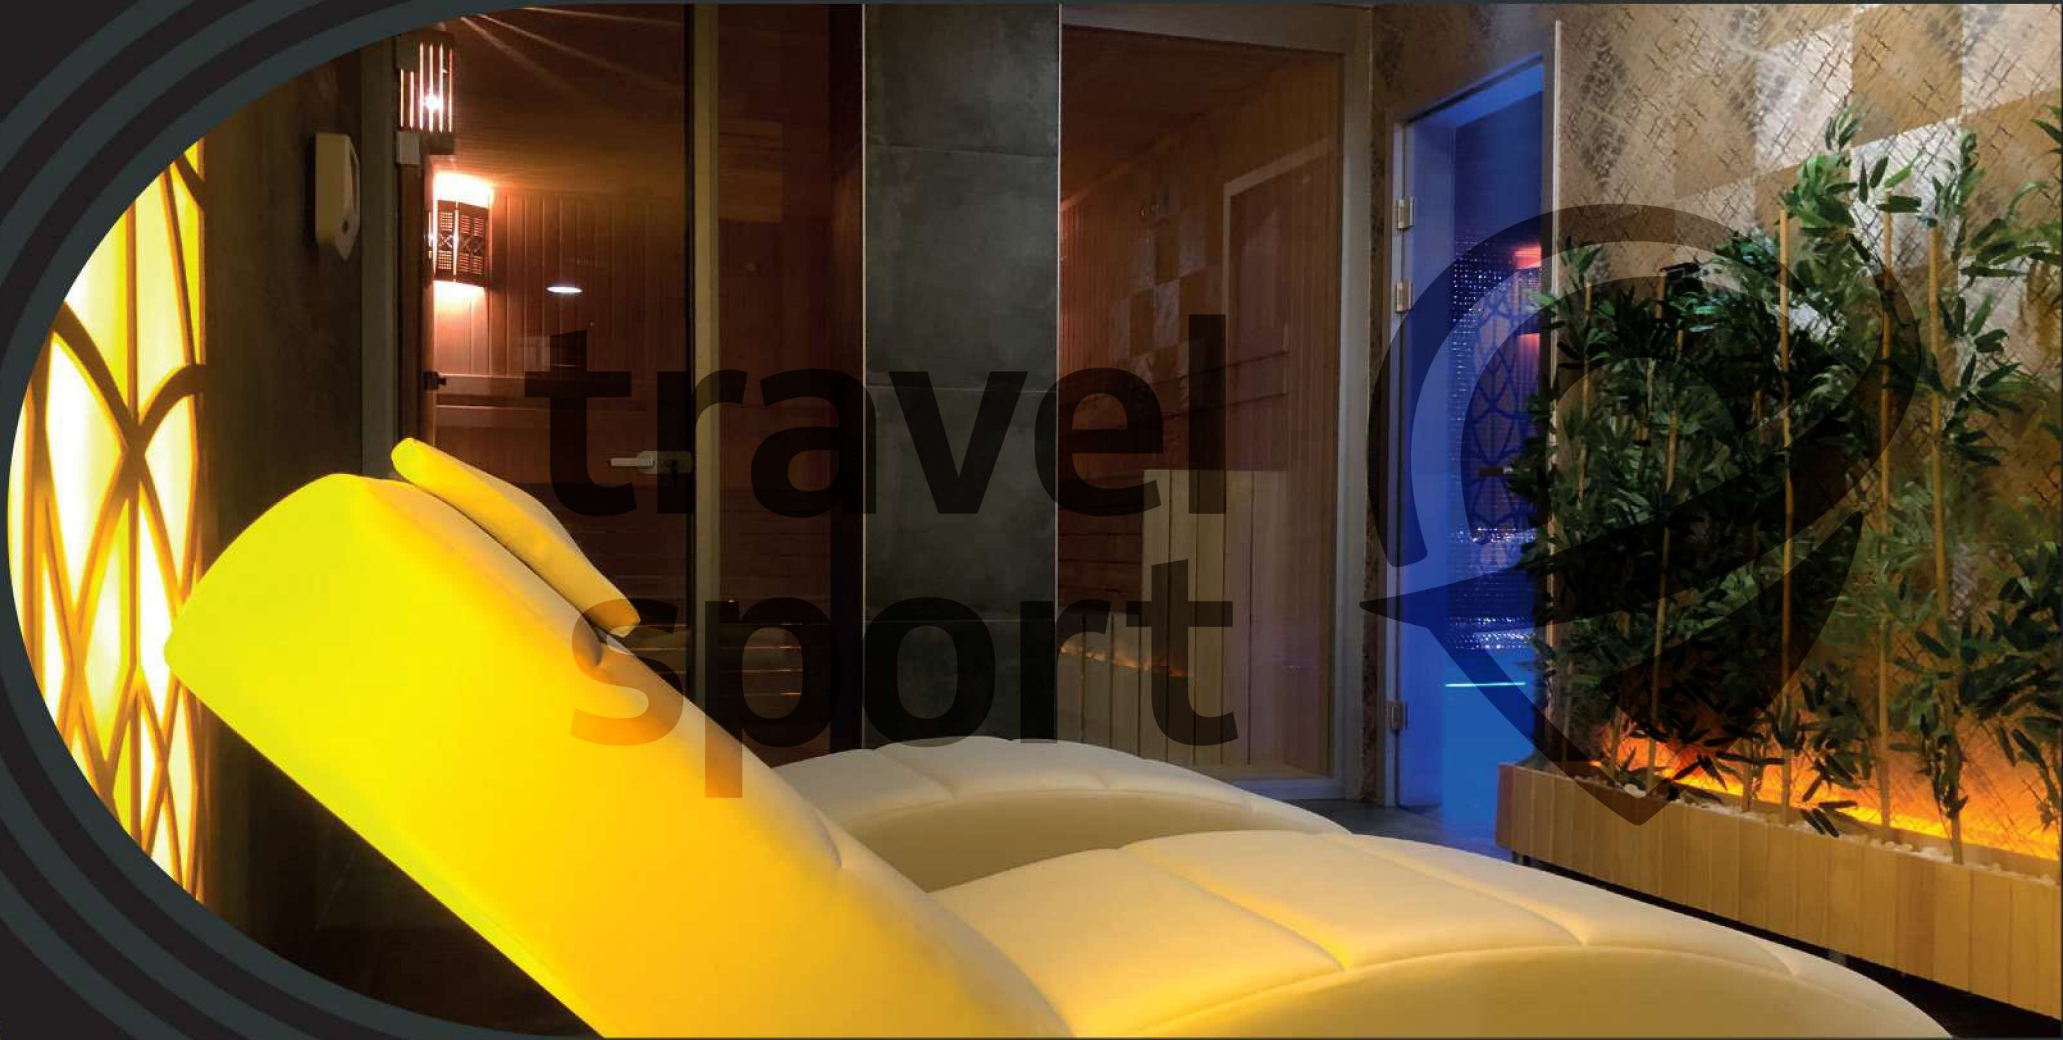

The hall, named after World Champion national athlete Ramil Guliyev, is equipped with high-level pneumatic devices and is designed to meet all the needs of athletes.

sport

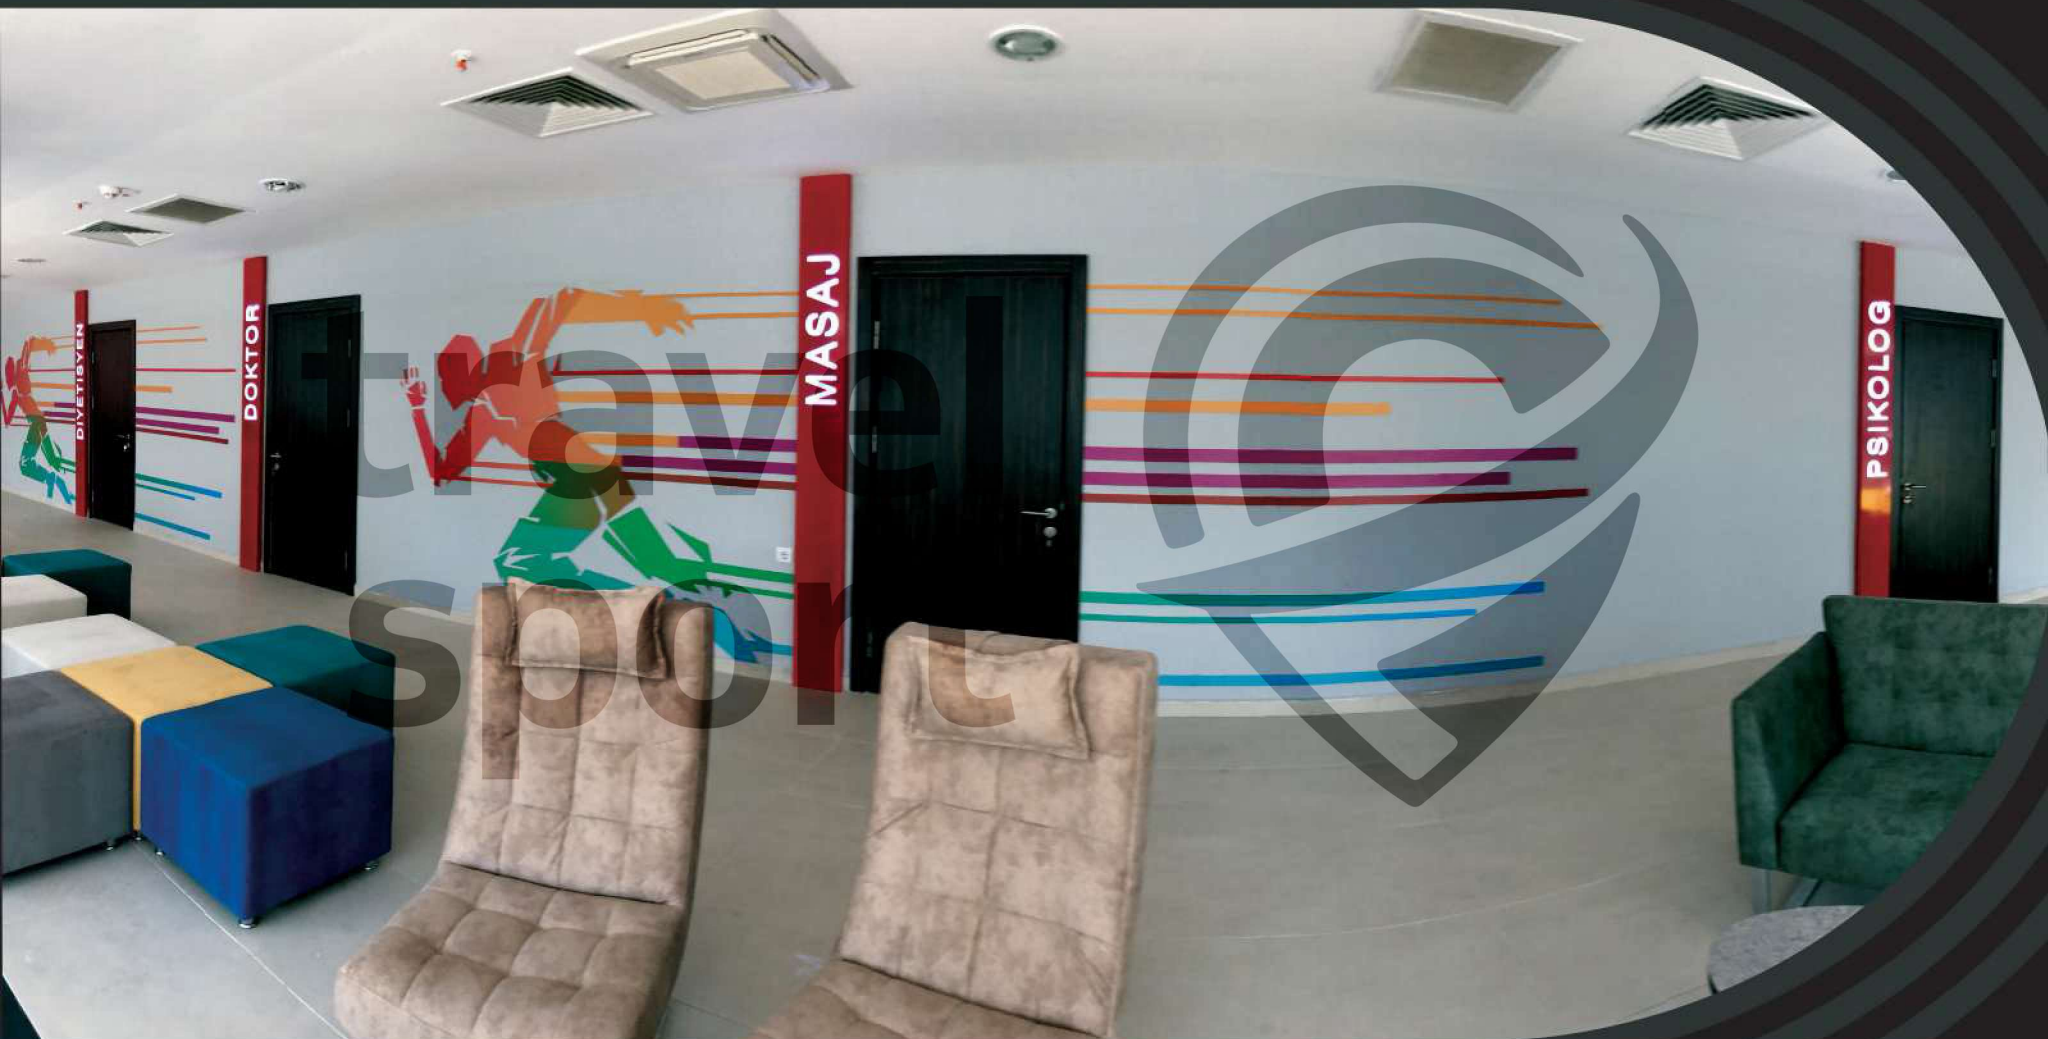

In the Spa Center, designed to support the healthy development of athletes, separate facilities for women and men were created, including showers, changing rooms, steam baths, saunas, and relaxation areas.

To ensure that athletes staying at the Center can complete their camp periods in a healthy way, our technical team consisting of expert dietitians, a sports physician, masseurs, and physiotherapists will provide full-time service.

A specially designed exhibition area was created to display competition equipment used in athletics disciplines, as well as cups and medals belonging to the Athletics Federation.

## SPOR TOTO CONFERENCE HALL

A 100-person capacity hall was built to provide training sessions and conferences for athletes.

In the Center, which has a total capacity of 228 beds, each floor was designed in a different color. Photographs of World and Turkish records in athletics, as well as Turkish record holders, were placed on the corridor walls with original designs.

On the orange and green floors, accommodation rooms were designed to meet high-level room standards, with a total of 44 double rooms serving 88 athletes.

The yellow and blue floors will serve athletes with a total of 36 triple rooms and 8 accessible rooms.

There are 8 suite rooms in the Center.

The Turkcell Dining Hall, with a total capacity of 340 people — 160 indoors and 130 outdoors — will serve our athletes three meals a day with an open buffet service.

İsmail Akçay Garden, with a capacity of 70 people indoors and 80 people outdoors, was equipped as an area where athletes can spend their free time outside training sessions.

It was named after our national athlete Yasmani Copello Escobar, who is an Olympic bronze medalist and World Championship silver medalist.
